

Comfort-Cire®

LE Series

SPLIT AIR CONDITIONER

Single Stage - 13.4 to 17 SEER2

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider a Comfort-Aire® system, quality and value are a given. You're getting peace of mind with great features and a smart design.

Efficiency ratings

Consider the SEER ratings that measure system performance. Higher numbers mean greater efficiency and lower energy bills for you.

Superior coil protection

For durability in harsh environments Total Corrosion Protection Technology is featured on select Comfort-Aire® air conditioner units, protecting against corrosive elements and extending the life of your air conditioner for years to come.

Immediate savings

With a high-efficiency system, you may qualify for local utility and energy incentives as well as rebates.[†] Your Comfort-Aire® professional can provide you with the latest information so you can take full advantage of available money-saving opportunities.

Is it time to replace your unit?

It can be hard to decide whether to repair or replace. Here are a few things to keep in mind when you're deciding:

- **Age of the unit** – You might want to consider a new unit if your air conditioner is at least 10 years old.
- **Updates** – New technology makes units more efficient and easier to control. Plus, older units use obsolete refrigerant than can be very expensive if the air conditioner needs to be recharged.
- **Repair costs** – Once repair costs exceed 50% of the cost of a new unit, a new purchase should be considered.

[†] Check with your local utilities to confirm eligibility. Rebates and incentives for efficiency vary by locality and utility. Comfort-Aire does not make any representation, warranty, guarantee, or other assurance as to whether the each model qualifies or is eligible for rebates in your local area.

WHATEVER YOUR NEEDS, A COMFORT-AIRE® AIR CONDITIONER IS THE RIGHT CHOICE.

COMPLIANT FOR NORTHERN
REGION ONLY

ASA13 Single Stage

Minimum Efficiency:
13.4 SEER2

The **ASA13** is the easy way to replace that older unit and gain efficiency and reliability.

COMPLIANT FOR ALL REGIONS

ASA14 Single Stage

Minimum Efficiency:
13.8 SEER2

Enjoy season after season of worry-free operation with the New **ASA14** condensing units, they will deliver significant energy savings when paired with a matched variable-speed or constant torque furnace or air handler. Your dealer can recommend the right pairing for your home.

COMPLIANT FOR ALL REGIONS

ASA16 Single Stage

Minimum Efficiency:
14.3 SEER2

The New **ASA16** condensing units will give you season after season of worry-free operation, and they will deliver significant energy savings when paired with a matched variable-speed or constant torque furnace or air handler. Your dealer can recommend the right pairing for your home.

Comfort-Aire®

MAKE THE COMFORT-AIRE® DECISION YOU WON'T REGRET.

When you think about everything Comfort-Aire® delivers, your decision is easy. With Comfort-Aire®, all your heating and cooling questions are answered. The performance and reliability you want are right here, and ready to go to work.

Comfort-Aire®. It's the right choice.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.

"This product complies with all California product labeling laws including, but not limited to, the Safe Drinking Water and Toxic Enforcement Act of 1986, more commonly known as Proposition 65."

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.
